

Position of Interest

Board President

Statement of Interest

For the past year, I've served on the Board of Directors of the ISC Gunners as the Secretary. We have had to make a number of strategic decisions, of which I have been an active, integral part. As President, I will continue to drive the Board to organize, decide, and take action toward becoming the best, most respected club in the state.

It is my objective on the board to drive the following:

- A fun, inclusive environment for kids and young adults at all skill levels, creating a clear path for player growth and development.
- Ensure a long term documented strategic direction for the club to provide clarity in decision making.
- Find solutions that will increase our field availability for rec through premier.

My family has been involved with ISC for a 2 and a half years as a parent of 3 Premier players (8, 10 & 12). My wife is the team manager of the 2 teams, which gives me another great perspective that I can apply to decisions on the board. As we are committed to the success of the program, we've been involved in getting to know almost every coach in the program personally as I feel it's important for the coaches to have a sense of belonging in the community. I also have deep passion for soccer and development of the soccer community here in Washington. I personally continue to play at least twice a week and am a student and fan of the game.

My 6 years on the Board of Eastside Baby Corner board (based here in Issaquah) will also be an asset to the development and growth of the ISC board. I served in many capacities on the EBC Board as we transitioned the board from an operational board to a governing board and scaled EBC to position it for growth outside of the Issaquah/Bellevue corridor. I've served as head of the development committee for 2 years, finance committee, executive committee, strategic planning task force, directed the re-brand of the organization, hiring the first Development Director and Executive Director, and drove the development of the mission, values, and vision for the organization. Involvement within EBC has also given me countless hours of time with many business leaders and social connectors within Issaquah, who are greatly interested in the continued growth of ISC, Issaquah, and the re-development of Lake Sammamish State Park to include turf, lit soccer fields.

Professional Profile

Looking for someone with more drive than a Ferrari? I am a product manager, problem solver, creative thinker, and "owner minded" individual, who can develop business strategy, build a plan and execute against it. I provide sound decision-making, strategic planning, and the ability to drive critical business results. Whether on a large scale business program or one on one with an employee or client, my passion is helping people and business achieve their greatest desires. I have knowledge and skills in many business functions from customer service, finance, strategy, operations, marketing, sales, to legal/regulatory, which I can pull from to make an impact in your business.
